**Movielight  
300 PRO**

# **The most practical Bowens Mount type fixtures out there!**

The new Movielight 300 PRO series has been created to make filmmakers' lives easier on set; this is why we opted for an integrated electronic ballast design. The Movielight 300 PRO circuitry is located in the top of the device; the AC feed is the only external cable that needs to be attached to a Powercon connector. Keeping things simple is our philosophy when it comes to designing our range of LED lights, and this simplified solution makes carrying and using these lights much easier. The special optics and reflector help make Movielight 300 PRO super bright and efficient.

## **Get rid of external ballasts and cables!**

# Super tough and solid

You might be wondering why we use polymers instead of conventional iron or aluminium. The truth is that – if you use products repeatedly or intensely – a supporting structure made of reinforced polymer performs better in terms of shock resistance, heat resistance, electrical safety and simplicity when assembling and disassembling for repairs. For TV studio usage, video, movie productions and rentals, try the Lupo products.

## New components for total solidity!

### MOVIELIGHT 300 PRO

Disconnect before opening

Weight: 5 kg  
AC: 50 V/240 V  
DC: 14.8 V  
Power: 200 W  
Peak: 250 W

Input: 50 / 60 Hz  
Max ambient temp.: 40°C  
IP 20
